

## The Problem

Valeo technical receive a number of calls regarding the Transit solid flywheel conversion kit and what vehicles it can be fitted to. These questions are answered in this bulletin.

## Vehicles 835000 can be fitted to

The solid flywheel conversion kit (835000) can only be fitted to 2.4 Transits built between 01/00 and 03/2006 with a 5 speed gearbox (MT75), not the 6 speed gearbox (MT82).

The earlier Transit (01/00 – 03/06) and the later Transit (03/06 – onwards) can be easily identified by looking at the body shape and the design of the headlights.

*Right are pictures of the two different shapes.*

The solid flywheel conversion kit 835000 can also be fitted to several other applications. These are:

LDV									
Convoy									
24TDI 16V	2402	66 90	24TDI-00	MT75	03/02 - 02/05	826648 KIT 3P + 11, SAT 835000 KIT 4P 826700 SERVICE KIT		250 250/23

## 835000 – What is in the kit?

Valeo technical also receive calls enquiring what is contained in the conversion kit. Below is a photograph of the kit with each part labelled and arrowed. Every part in the kit is to be used to ensure a correct fitment and operation. Before fitment of the flywheel conversion kit, please ensure the friction surface area on the flywheel and the pressure plate are fully degreased so clutch slipping or juddering issues do not occur once fitted. The release arm **MUST** be replaced when fitting 835000 to ensure correct operation of the release mechanism. Ford OE ref. 4412069 must not be used, only use Ford OE ref. 4401551. An equivalent of this arm is supplied in the kit.
