

## The Problem

This bulletin has been produced by the Valeo technical department to ensure the CSC in the box is correct so to avoid time being wasted by the person fitting the unit.

When examining 804504 and 804538 separately, it is difficult to determine what the differences are.

Part number 804504 is fitted to Vauxhall and Opel vehicles with an F13 and F17 Gearbox

Part number 804538 is fitted to Vauxhall and Opel vehicles with a F23 gearbox.

Below are pictures of the two units and the differences highlighted.

*Note the extra casting on 804504 and different location of bolt hole in relation to the hydraulic connector.*

If these two part numbers have been supplied to a customer due to a choice on the vehicle, when one is returned, check the CSC so to avoid difficulties when supplying it in the future.

**T.S.B. No.:**  
CL022/09

**PRODUCT:**  
Clutch

**MARQUE:**  
Vauxhall and Opel

**PART No.:**  
804504, 804538

**SUBJECT:**  
Differences between 804504 and 804538 which are difficult to determine

**DATE:**  
November 2009
